

## Education with 21st century tools, thinking and

*“At this point we appear to have a 19th century curriculum, 20th century buildings and organisations and 21st century students facing an undefined future.” - Bruce Wellman*

Teachers and parents need to change outdated paradigms as they prepare their children for academic success and the ability to face the demands of the 21st century workplace. Reimagining education for the 21st century is challenging and demanding and yet it must be done. Through dynamic and interactive presentations, we challenge, teach and equip teachers and parents to be more effective in this fast-paced and changing world.

Currently the Head of Primary at Elkanah House School in Cape Town and the principal of the Senior Primary campus, Arthur Preston is well-placed to take your teaching team to a new level of understanding and skill development as he brings the experience, understanding and knowledge that comes from over two decades working with children as a teacher, headmaster and parent. He is a regular presenter at conferences and seminars throughout South Africa and beyond its borders having presented in Canada, Switzerland, Kenya and Zambia as a keynote speaker and workshop leader.

What we offer:

## Parents:

### Parenting 2.0

Tips, ideas and practical advice on how to engage our children in the world of social media and mobile technology

### Hands on iPads

A practical hands-on introduction to the iPad with a particular emphasis on understanding how to use restrictions sensibly with children

### Changing Times - An intro to 21st century schooling

This presentation is designed to assist parents in understanding the trends and disruptive forces shaping the education landscape

## Teachers:

### I Belong!

Creating a culture of care and connection in your staffroom - impact your pupils, parents and staff

### Engage!

'To boldly go where no-one has gone before' - teaching with the future in mind

### Discovering SAMR

Using Dr Puetendura's SAMR model of technology integration, teachers will learn how to create lessons which redefine the learning experience

### Innovate your school

Creating a culture which breeds innovation in your school

## The Value of Us

Discover the link between school culture, values, relationships and pupil outcomes

## Using Social Media In Your Classroom

Practical ways in which you can utilise social media for effective teaching

## Building Digital Fluency Into Your Curriculum

A hands-on workshop helping teachers integrate a variety of Web2.0 tools and digital competencies

## Twitter Bootcamp

A hands-on introduction to Twitter for teachers

## Remind Me Why I Teach!

A fun-filled workshop of activities and learning which helps teachers rediscover the passion for their calling

## Marketing Your School Using Social Media

Using new media tools to market to a new generation of prospective parents

## Information Overload?

Learning to harness the power of the internet for professional growth

**Presentations can be customised to your particular school's needs - just ask!**
